*1a* — Looks like you're well on your way to a decent level of command line proficiency. Your examples could have been a little more sophisticated and you had some small mistakes in your definitions, but other than that things are fine.

And thank you for getting around to telling me where your DIY *git* repository is—if you think about it, you really *had* to tell me, because I would otherwise have no way of knowing where you put it :) (|)

*4e* — Version control frequency and messages are appropriate for the work done. (+)

*4f* — Assignment done on time. (+)
